

### **Writing Selected Response Items - Assignment #3**

Construct the designated number of items of the following types:

- a. three (3) true-false, true-false-corrections, or sometimes-always-never items,
- b. three (3) multiple-choice items,
- c. one (1) matching item (minimum 6 matches), and
- d. three (3) fill-in-the-blank items.

Provide brief instructions (to the student) for each item type as well as the correct answer for each item. In terms of the students, these would be intended to be of approximately equal value on a test. The items would most likely be scored as correct or incorrect.

Be sure to avoid the composition pitfalls discussed in the course materials.
