

Gadzooks!

A zebra is on the loose. The zebra is standing in front of a row of houses. It knows it belongs in one of them, but can't remember which one.

Luckily, the zebra knows many things about the houses, and the people who live in them. Even better, the zebra is able to communicate these things to you, in order for you to help it find out where it lives.

Use the following guidelines to determine who owns the zebra:

- There are 5 houses
- Each house has its own unique color
- All house owners are of different nationalities
- They all have different pets
- They all drink different drinks
- They all smoke different cigarettes
- The Englishman lives in the red house
- The Swede has a dog
- The Dane drinks tea
- The green house is on the left of the white house
- In the green house they drink coffee
- The man who smokes Pall Mall cigarettes keeps birds
- In the yellow house they smoke Dunhill Cigarettes
- They drink Milk in the middle house
- The Norwegian lives in the first house
- The man who smokes blend lives in the house next to the house with cats
- In the house next to the house where they have a horse, they smoke Dunhill
- The man who smokes Blue Master drinks beer
- The German smokes Prince cigarettes
- The Norwegian lives next to the blue house
- They drink water in the house next to the house where they smoke blend
- The Norwegian lives in the yellow house
- The Swede drinks beer

To which house does the zebra belong?
